SEMINAR

On Lupaş Operators

SPEAKER : **Gülen BAŞCANBAZ TUNCA (Ankara University)**

DATE : **24 March, 2017**

TIME : **13:30**

PLACE : **Çankaya University (Central Campus), R-213**

Abstract: In this talk, we deal with an operator defined by Lupaş and give an extension of this operator. We obtain a recurrence formula to calculate the moments and study the weighted uniform approximation for the sequence of the new operators. We also show the monotonic convergency under the convexity of the operand.

All interested are cordially invited.

ADDRESS : **Eskişehir Yolu 29.km, 06810, Etimesgut/ANKARA**
