

# **ÇANKAYA UNIVERSITY Faculty of Arts and Sciences**

# **Course Definition Form**

This form should be used for either an elective or a compulsory course being proposed and for a curriculum development process for an undergraduate curriculum at Çankaya University, Faculty of Arts and Sciences. Please fill in the form completely and submit the print-out carrying the approval of the Department Chair to the Dean's Office and mail its electronic copy to <a href="mailto:akguc@cankaya.edu.tr">akguc@cankaya.edu.tr</a>. Upon receipt of both copies, the print-out will be forwarded to the Faculty Academic Board for approval. Incomplete forms will be returned to the Department. The approved form is finally sent to the President's office for approval by the Senate.

FORM: FEA-CDF-B2-JUNE-2013

## **Course Objectives**

Maximum 100 words.

To teach basic topology of Euclidean space and give the ideas of continuity and uniform continuity, convergence and uniform convergence, and to teach the differences and applications of these concepts.

#### **Learning Outcomes**

Explain the learning outcomes of the course. Maximum 10 items.

- 1) The students will understand the basics of the topology of the Euclidean space (open, closed sets, compactness, completeness, boundary, closure etc.)
- 2) The students will understand the notions; uniform continuity of a function and uniform convergence of a sequence of functions
- 3) The students will establish the difference between these concepts

|------|------|-----|-----|

Explain how you will organize the course (lectures, laboratories, tutorials, studio work, seminars, etc.)

4 hours of lecturing per week. Attendance to the lectures is compulsory.

## Laboratory/Studio Work

Give the number of laboratory/studio hours required per week, if any, to do supervised laboratory/studio work and list the names of the laboratories/studios in which these sessions will be conducted.

| C     |       | Ilaama |
|-------|-------|--------|
| COIII | puter | Usage  |

Briefly describe the computer usage and the hardware/software requirements for the course.

|      | Course Outline List the weekly topics to be covered.   |  |  |  |  |  |  |
|------|--|--|--|--|--|--|--|
| Week | Topic(s)   |  |  |  |  |  |  |
| 1    | The Real line and Euclidean space (ordered field, distance, Schwarz Inequality)                                    |  |  |  |  |  |  |
| 2    | The topology of Euclidean space; open sets, Interior of a set, closed sets,  |  |  |  |  |  |  |
| 3    | The topology of Euclidean space; accumulation points, closure of a set, boundary of a set, sequences, completeness |  |  |  |  |  |  |
| 4    | Compact and Connected sets; compactness, the Heine-Borel theorem,  |  |  |  |  |  |  |
| 5    | Compact and Connected sets; Nested set property, Path-connected sets, Connected sets                               |  |  |  |  |  |  |
| 6    | Continuous Mappings; continuity, Images of compact and connected sets  |  |  |  |  |  |  |
| 7    | Continuous Mappings; operations on continuous mappings, the Boundedness of continuous functions on compact sets    |  |  |  |  |  |  |
| 8    | Continuous Mappings; Uniform continuity  |  |  |  |  |  |  |
| 9    | Uniform convergence  |  |  |  |  |  |  |
| 10   | Pointwise convergence, the Weierstrass M-test Uniform convergence  |  |  |  |  |  |  |
| 11   | Integration and differentiation of series Uniform convergence;   |  |  |  |  |  |  |
| 12   | Line Integrals, Flux, Path independence  |  |  |  |  |  |  |
| 13   | Fundamental theorem of line integrals  |  |  |  |  |  |  |
| 14   | Green's theorem (Flux divergence and Circulation-Curl)   |  |  |  |  |  |  |

| Grading Policy List the assessment tools and their percentages that may give an idea about their relative importance to the end-of-semester grade. |          |            |                            |          |            |                 |          |            |  |

Total Workloads are calculated automatically by formulas. To update all the formulas in the document first press CTRL+A and then press F9.

**Program Qualifications vs. Learning Outcomes** Consider the program qualifications given below as determined in terms of learning outcomes and acquisition of capabilities for all the courses in the curriculum. Look at the learning outcomes of this course given above. Relate these two using the Likert Scale by marking with X in one of the five choices at the right.

| No | Program Qualifications   | Contribution |   |   |   |   |  |
|----|--|--------------|---|---|---|---|--|
| NO | Program Qualifications   | 0            | 1 | 2 | 3 | 4 |  |
| 1  | Adequate knowledge in mathematics; ability to use applied and theoretical information in these areas to solve pure and applied mathematics problems.   |              |   |   |   | х |  |
| 2  | Ability to use modern computational tools to analyze an abstract or real life problem  |              |   | x |   |   |  |
| 3  | Adequate knowledge in theoretical and historical background in mathematics   |              |   |   | х |   |  |
| 4  | Ability to work individually and in teams efficiently, ability to collaborate effectively in teams to analyze complex systems from intra-disciplinary and multi-disciplinary areas                                   |              |   |   | х |   |  |
| 5  | Ability to communicate effectively in English about technical subjects, both orally and in writing   |              |   |   | х |   |  |
| 6  | Ability to use, develop and implement new experiments and algorithms to solve scientific, engineering and financial problems   |              |   |   | х |   |  |
| 7  | Ability to analyze a mathematical problem using both analytical and numerical methods; use and compare theoretical and simulational methods to gain deeper insight   |              |   |   | х |   |  |
| 8  | Ability to report the findings, conclusions and interpretations related to a project in the area of pure and applied mathematics, ability to write technical reports, to prepare and conduct effective presentations |              |   |   | х |   |  |
| 9  | Recognition of the need for lifelong learning; ability to access information, to follow developments in science and technology, and to keep continuous self improvement  |              |   |   | х |   |  |
| 10 | Awareness of professional and ethical responsibility issues and their legal consequences   |              |   |   |   | х |  |

Scale for contribution to a qualification: 0-none, 1-little, 2-moderate, 3-considerable, 4-highest
